### **DETAILED ACTION**

### **Drawings**

1. Figures 1, 4 and 5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

# Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 38-42 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for felts with void volumes as described on page 42, lines 24-26, i.e., with void volume between 50-3000 cm<sup>3</sup>/m<sup>2</sup>, does not reasonably provide enablement for void volume of less than 50 cm<sup>3</sup>/m<sup>2</sup>. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims.

# Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 09/987,248

Art Unit: 1731

5. Claims 38-42 are rejected under 35 U.S.C. 102(b) as being anticipated by applicants admission, see page 35, lines 13-19 and pages 43-44.

Applicants teach, in the above pages, prior art belts that can be used in the invention. All of the cited belts having void volume within the claimed range, i.e., less than 1500 cm<sup>3</sup>/m<sup>2</sup>. Applicants also admit that the belts could be grooved, such as the ones disclosed by Justus and Cronin, page 43, lines 8-11, or Slater and Fitzpatrick, page 43, lines 17-22, or Madden, page 43, line 23 through page 44, line 6. It is important to note that the way in which a product is used does not differentiated the product from a prior art product having the same properties. The product could inherently be used in the same way(s) as claimed.

6. Claims 38-42 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kiuchi et al., US Patent No. 4,701,368, or Hartigan, Jr., US Patent No. 4,482,601, or Stigberg, US Patent No. 5,171,389, or Cronin et al., US Patent No. 4,978,428 or, Salmine et al., US Patent No. 4,496,429 or Dutt, US Patent No. 6,174,825 B1, (102(e)).

All of the above patents teach a pressing belt/felt having grooves or blinded holes as claimed. Even though the above do not explicitly teach the void volume as claimed, (at least in the claimed units), the void volume of the belt(s) are within the claimed ranges or at least the minor modifications to obtain the claimed porosity would have been obvious to one of ordinary skill in the art. Note that the making and the raw materials use to make the belts of the references, are within the parameters of the belts disclosed by applicants, e.g., the belts disclosed in pages 43-44.

Page 4

Art Unit: 1731

It is important to note that the way in which a product is used does not differentiated the product from a prior art product having the same properties. The product could inherently be used in the same way(s) as claimed.

#### Conclusion

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure in the art of "Pressing Belts/Felts."
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to José Fortuna, whose telephone number is (703)305-7498. The examiner can normally be reached on Monday-Friday from 9:30 A.M. to 5:30 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley S. Silverman, can be reached on (703)308-3837. The fax number for this group is (703)305-7115.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)308-0661.

When filing a FAX in group 1730, please indicate in the Header (upper right) "Official" for papers that are to be entered into the file, and "Unofficial" for draft documents and other communication with the PTO that are not for entry into the file of the application. This will expedite processing of your papers.
